To whom it may concern

Subject: cooperation and support from local government

Dear sir/madam,

I, Maker Lual, the Commissioner of Bor County would like to declare as of this writing that Bor County government is aware of the secondary school being build in Gak Boma, Kolnyang Payam in Bor County by Cuey Machar Secondary School Foundation (CMSF). I personally visited the construction site several times as part of my official trips to Gak Boma.

As you might know, there are few secondary schools in Bor County. So we are very pleased to have one coming up. Unfortunately we as County have no enough money to give a financial support to the very NGO. However this does not exempt as from our responsibility to provide education at its various level to our young one.

Therefore, Bor County in cooperation with Jonglei State ministry of education would hereby declare their commitment to give support to the concerned secondary school when the construction and furniture phases have been brought to an end. The issue of recognition of the certificate and payment of teachers' salaries shall be of the local government concern and are for sure granted as per this letter.

The two responsible institutions (Bor County and State Ministry of Education) are therefore fully aware of the construction of the school and shall bear the responsibilities concerning sustainability of the school wherever and whenever needed or deemed necessary.

We are looking forwards seeing a fruitful support from all well wishers in order to bring this project to an end for the benefit of Bor County.

H.E. the Commissioner
Maker Lual
